

Project: *Reconstruction of Rte. 17 over Long Hill Brook*
Location: *Middletown, Connecticut*
Owner: *Connecticut Department of Transportation*

A.DiCesare Associates provided Resident Engineering and Construction Engineering Services in connection with the reconstruction of the bridge over Long Hill Brook in Middletown, Connecticut. The project involved complete superstructure and substructure replacement including stream diversion, cofferdams, dewatering, and H-piled foundations. Extensive maintenance and protection of traffic including multiple phases of construction were necessary to maintain both vehicular and pedestrian traffic serving local businesses and residents throughout the area. Adherence to Connecticut Department of Transportation Specifications and Manual of Construction guidelines were applied on this Federally/State funded project.
