

Project: *Reconstruction of Sikorsky Bridge*

Location: *Milford, Connecticut*

Owner: *Connecticut Department of Transportation*

Working with Balfour Beatty Construction Inc., A.DiCesare Associates is providing professional engineering and construction support services for the Reconstruction of the Sikorsky Bridge (US Route 15) over the Housatonic River. The \$85 Million Reconstruction Project includes complete bridge replacement to convert the four-lane structure to six-lanes with full shoulders. The new bridge consists of five continuous spans for an overall length of approximately 1,800 linear feet.

Multiple stages of construction together with extensive coordination with the Connecticut Department of Transportation, Metro-North Railroad, US Coast, and Connecticut Department of Environmental Protection are key to project success.

A.DiCesare Associates, P.C.
