

Project: *2013-2016 Biennial Highway Bridge Inspection*
Location: *Statewide throughout Connecticut*
Owner: *Connecticut Department of Transportation*

A. DiCesare Associates (ADA) is participating in the 2013-2016 Bridge and Sign Structure Inspection Program. Bridges include the Dexter Coffin Bridge (carrying I-91 over the Connecticut River) and the bridge carrying I-291 over I-91 in the Town of Windsor. The objective of this project is to perform field inspections and condition evaluations of bridges in accordance with the Connecticut Department of Transportation Bridge Inspection Manual, September 2001, Version 2.1 (BIM) as revised, the National Bridge Inspection Standards (NBIS), 23 CFR Part 650, and the latest FHWA Guidelines. The main task is to perform routine and in-depth inspections of state and town bridges throughout the state. Along with inspecting the structures, ADA is required to document structure conditions in an inspection report and prepare maintenance memorandums for those structures needing repairs and performing various testing as required.
