

Project: *Forced Main Sanitary Installation and
Roadway Reconstruction*

Location: *Westport, Connecticut*

Owner: *Town of Westport-Department of Public Works*

A.DiCesare engineers provided sanitary sewer design for 3,000 linear feet of forced sanitary sewer, manholes, lateral curb boxes, and roadway reconstruction along Owenoke Park (a private roadway along Long Island Sound).

The project included relocation of overhead utilities (electric, telephone & cable television) beneath the roadway during construction Resident construction engineering services provided during the duration of the project.

Extensive construction phasing was necessary to maintain vehicular traffic to more than fifty homes during construction.
