

Project: *Rehabilitation of NRG Devon Power Bridge*
Location: *Milford, Connecticut*
Owner: *NRG Devon Power*

A.DiCesare Associates performed an in-depth inspection, evaluation, load rating analysis, load posting, remedial interim repairs and rehabilitation design to strengthen a private roadway bridge leading to the Devon Power Station along the Housatonic River in Milford, CT. Rehabilitation consisted of steel repairs, precast deck replacement and painting of the structural steel. The bridge crosses over Metro-North Railroad's Waterbury branch line.

Plans and specifications prepared in sufficient detail (shop drawings) to permit fabrication. All work is to be performed by independent Contractor working within construction phasing necessary to maintain this active crossing of the Waterbury line.

A.DiCesare Associates, P.C.
