

Project: *New Haven-Hartford-Springfield Rail Corridor*
Location: *Statewide*
Owner: *Connecticut Department of Transportation/Amtrak*

A.DiCesare Associates is participating in the Program Management for the restoration of approximately 62-miles of rail corridor between New Haven, CT and Springfield, MA with the objective of being able to provide Hi-Speed Rail Services along the corridor.

The corridor includes 60 undergrade railroad bridges ranging in span length from 5 feet to 1,541 feet. There are 174 culverts, 69 overhead bridges, and 6 pedestrian bridges. Structure types vary from concrete and masonry arches to steel through girder and deck girder bridges.

A.DiCesare Associates involvement includes routine and in-depth inspections, load rating analysis, evaluation, preliminary design services for rehabilitation and or replacement, and value engineering services.
