

Project: *Biennial Inspection and Evaluation of Structures from NYC to Albany*

Location: *Southern, New York*

Owner: *New York State Thruway Authority*

A.DiCesare Associates is involved in the biennial inspection and evaluation of 180 bridges and 100 overhead sign support structures from the New York City border to Albany along the New York State Thruway highway system. Specifically, A.DiCesare Associates is in charge of the underwater inspection of all waterway crossings. Personnel consist of Engineer/Divers to assure engineering judgment in depiction of inspection findings. The recording of inspection findings accomplished utilizing the Authority's electronic format Bridge Inspection Management System (BIMS).

Bridges vary from single spans to multiple spans over major waterways such as the Hudson River. Inspection includes a tactile investigation of all structures below water level, as well as protective devices such as fender systems and cofferdams. Adherence to OSHA regulations required for all aspects of field activities.

A.DiCesare Associates, P.C.
